

THE NEXT GENERATION

A large orange and black GIPO P 101 GIGA / GIPO P 111 GIGA machine is shown in operation, dumping a large pile of dark gravel. The machine is positioned on a dirt road, and the background shows a clear blue sky with some clouds.

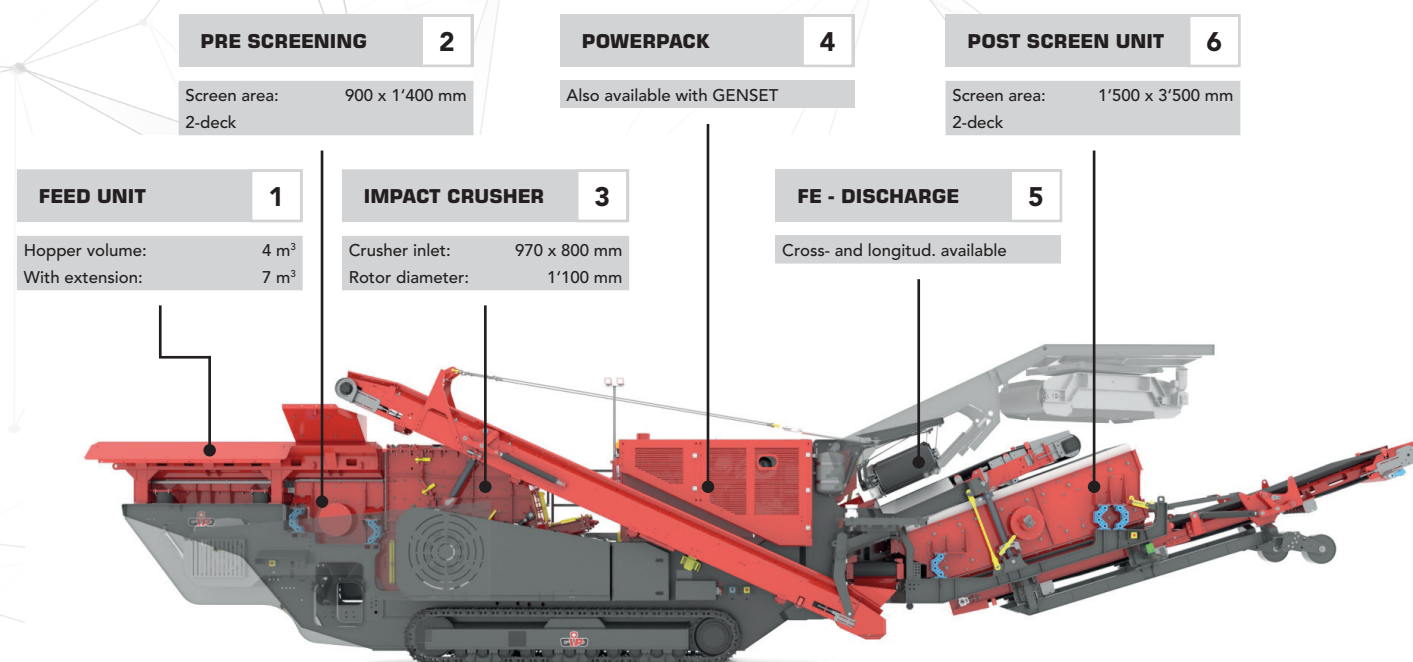

COMPACT FLEXIBLE FORWARD-LOOKING

DISCOVER THE NEW GIPO MODELS!

GIPO P 101 GIGA / GIPO P 111 GIGA

GIPO P 101 GIGA

The GIPO P 101 GIGA is a new development in a compact design with low transport weight and minimal dimensions – flexible and powerful.

FEED PERFORMANCE

Up to approx.

POWERPACK

250 t/h

Engine type
Drive power

CAT / SCANIA - Stage 5
up to 331 kW

TRANSPORT MEASURES

Transport height
Transport width

3'150 mm
2'550 mm

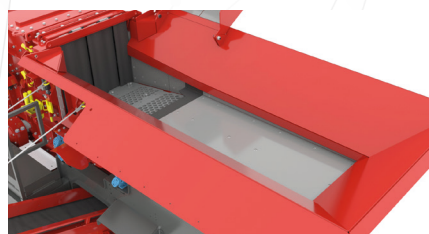

TRANSPORT WEIGHT

Transport compl.
Transport without GIGA

46'000 - 48'000 kg
38'000 kg

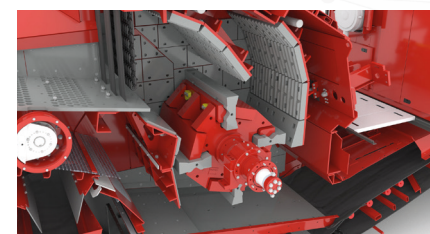

FEED UNIT 1

Conical opening feed hopper with powerful feed chute for optimal material removal.

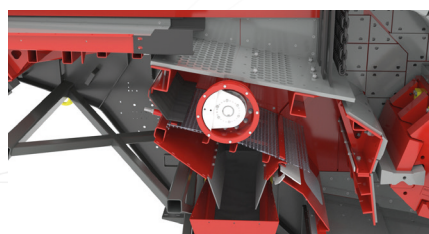

IMPACT CRUSHER 3

Powerful impact crusher with large clearance under the rotor. Generous outlet for perfect material flow.

PRE SCREENING 2

Highly efficient pre-classification thanks to 10° inclination angle on the upper deck. Side discharge with plug-in or foldable conveyor belt.

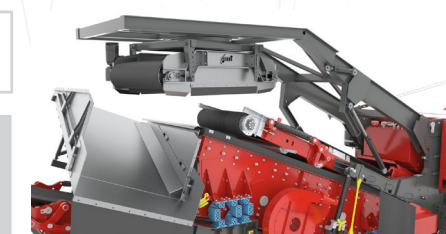

POWERPACK 4

Either a diesel-hydraulic or a genset unit can be installed. Diesel engine make can be selected.

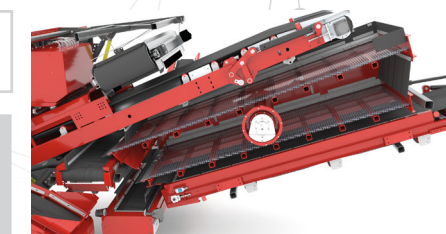

FE - DISCHARGE 5

Depending on the application, we offer a transverse or longitudinal discharge to remove iron from any material.

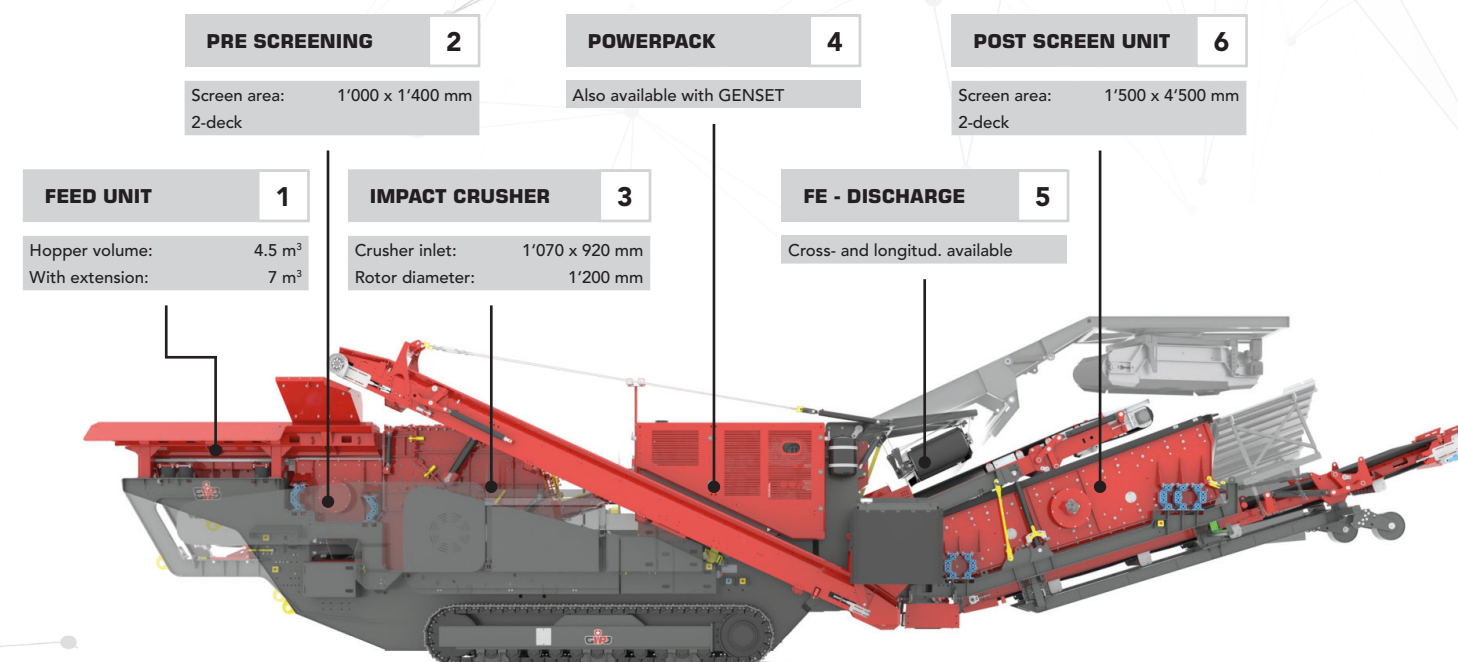

POST SCREEN UNIT 6

With the revised screening machine, the desired fractions can be separated even more cleanly and stockpiled.

GIPO P 111 GIGA

With the GIPO P 111 GIGA you benefit from a powerful, compact system with low transport weight and maximum flexibility.

FEED PERFORMANCE

Up to approx.

POWERPACK

300 t/h

Engine type
Drive power

CAT / SCANIA - Stage 5
up to 450 kW

TRANSPORT MEASURES

Transport height
Transport width

3'500 mm
3'000 mm

TRANSPORT WEIGHT

Transport compl.
Transport without GIGA

56'000 - 59'000 kg
47'000 - 50'000 kg

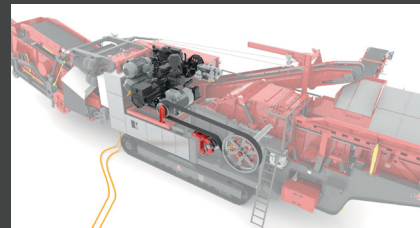

COMPACT

The new models impress with their compact design, which enables maximum performance in minimal space. Despite their compact dimensions, they offer the latest technology and reliable performance for demanding applications.

FLEXIBLE

The GIPO P 101 and P 111 impress with maximum flexibility and mobility. Thanks to their well thought-out design, they are easy to transport and quickly ready for use - ideal for changing locations and maximum efficiency.

FORWARD-LOOKING

The modern genset drive combines maximum energy efficiency with impressive independence and makes the systems environmentally friendly all-rounders – perfectly tailored to the requirements of the future.
